December '63: Frankie Vallie & The Four Seasons Tribute

December '63

About

December ’63 is a concert tribute to the music of Frankie Valli and The Four Seasons. The show centers on the songs most associated with Frankie Valli, with a set built around the classics that have remained popular for decades.

The performance is presented as a re-creation of a Frankie Valli and The Four Seasons concert, with cast and band moving through the different phases of the careers of Frankie and the boys. It is a format that keeps the focus on familiar material and the feel of the original era.

The catalog includes the group’s early run of major hits. In 1962, their first album featured “Sherry,” which became both their first charted hit and their first number-one song. The Four Seasons followed with more million-selling releases, including “Big Girls Don’t Cry,” their second #1 hit, “Walk Like A Man,” their third #1, “Candy Girl,” and others.

From 1962 to early 1964, only The Beach Boys matched the Four Seasons in U.S. record sales. For buyers and audiences alike, that makes the appeal easy to recognize: a night built around enduring pop hits from one of the defining groups of the period.
